the book gathers several contributions by historians of physics philosophers of science and scientists as new essays in the history of physics ranging across the entire field related in most instances to the works of Galileo Galilei 1564-1642 one of the field's most prominent scholars since the second half of the past century a phenomenon is an observable measurable fact including data modelling assumptions laws a mechanical phenomenon is associated to equilibrium motion are all mechanisms mechanisms of a phenomenon scholars with different backgrounds discuss mechanism phenomena from an historical point of view the book is also devoted to understanding of causations of disequilibrium shock gravitational attraction repulsion inertia entropy etc including changes interaction in the framework of irregular cases of modern physics as well the book is an accessible avenue to understanding phenomena ideas and mechanisms by leading authorities who offer much needed historical insights into the field and on the relationship physics mathematics it provides an absorbing and revealing read for historians philosophers and scientists alike

for decades patients have been told that viruses like herpes simplex virus hsv cytomegalovirus cmv and Epstein-Barr virus ebv are lifelong conventional medicine focuses on suppression not elimination but what if those assumptions were outdated what if modern lab results could prove otherwise in this evidence based book Dr Arjun Kumar challenges the prevailing medical belief that chronic viral infections cannot be

cured using the time tested science of ayurveda he presents a structured treatment approach that has helped patients achieve what was once considered impossible negative igg antibody levels and virus free dna pcr qualitative test results this is not theory it is based on clinical observation diagnostic follow up and repeatable results the author himself underwent treatment after an hsv diagnosis applying ayurvedic protocols based on rasayana therapy and mineral formulations through consistent follow up testing the virus was no longer detectable this book offers a clear framework for ayurvedic viral elimination not suppression scientific explanation of why these viruses persist and how to target them laboratory data and case studies to support each step a personalized treatment model based on constitution and immune terrain a detailed breakdown of herbal and mineral formulations used in recovery whether you are a patient searching for a solution a practitioner seeking better outcomes or a medical researcher open to data driven alternatives this book offers a clinically sound path toward complete recovery cure is not a myth it s a protocol

in cords of affection constructing constitutional union in early american history emily pears investigates efforts by the founding generation s leadership to construct and strengthen political attachments in and among the citizens of the new republic these emotional connections between citizens and their institutions were critical to the success of the new nation the founders recognized that attachments do not form automatically and require constant tending emily pears defines and develops a theory of political attachments based on an analysis of the approaches used in the founding era in particular she identifies three methods of political attachment a utilitarian method a cultural method and a participatory method cords of affection offers a comparative analysis of the theories and projects undertaken by a wide array of political leaders in the early republic and antebellum periods that exemplify each of the three methods the work includes new historical analysis of the implementation of projects of nationalism and attachment ranging from data on federal funding for internal improvements to analysis of whig orations in cords of affection emily pears offers lessons from history about the strengths weaknesses and pitfalls of various approaches to constructing national political attachments twenty first century americans attachments to their national government have waned while there are multiple narratives of this decline they all have the same core element a citizenry unwilling to uphold the norms and institutions of american democracy in the face of challenge when a demagogue or a populist movement or a foreign power threatens action that undermines american democracy citizens will not come to its defense citizens cheer their own side regardless of the means it uses or they are simply apathetic to the role that institutions and institutional constraints play in keeping us all free and equal at worst americans have come to regard their inherited constitutional foundations as unjust biased or ill equipped for the modern world and the notion of a shared political community as prejudicial and old fashioned they feel little sense of attachment to the american regime by contrast the lessons in cords of affection allow us to consider a broader array of possible tools for the maintenance of today s political attachments

this volume of anti natural framework its consequences is a conspiracy theory on how certain scientific findings principles have been concealed from the world and how alternatives to each one of them have been projected to the world a few examples of this are the concealment of the upright rectangular universe and projection and propagation of the universally accepted running and moving global universe the concealment of the sirius binary system two horizons west horizon and east horizon mercurial system two hemispheres northern hemisphere and southern hemisphere and existential import of the barrier between equal and opposite natural mechanisms solar system and projection and propagation of the universally accepted solar system as if sirius binary system mercurial system solar system

how do we cooperate in social local business and state communities this book proposes an outcome based cooperative model in which all stakeholders work together on the basis of trust and respect to achieve shared aims and outcomes the outcome based cooperative model is built up from an extensive analysis of behavioural and social psychology genetic anthropology research into behaviour and culture in societies organisations regulation and enforcement the starting point is acceptance that humanity is facing ever larger risks which are now systemic and even existential to overcome the challenges humans need to cooperate more rather than compete alienate or draw apart answering how we do that requires basing ourselves our institutions and systems on relationships that are built on trust trust is based on evidence that we can be trusted to behave well ethically built up over time we should aim to agree common goals and outcomes moderating those that conflict produce evidence that we can be trusted and examine our performance in achieving the right outcomes rather than harmful ones the implications are that we need to do more in rebasing our relationships in local groupings business organisations regulation and dispute resolution the book examines recent systems and developments in all these areas and makes proposals of profound importance for reform this is a new blueprint for liberty solidarity performance and achievement

classical and modern approaches in the theory of mechanisms is a study of mechanisms in the broadest sense covering the theoretical background of mechanisms their structures and components the planar and spatial analysis of mechanisms motion transmission and technical approaches to kinematics mechanical systems and machine dynamics in addition to classical approaches the book presents two new methods the analytic assisted method using turbo pascal calculation programs and the graphic assisted method outlining the steps required for the development of graphic constructions using autocad the applications of these methods are illustrated with examples aimed at students of mechanical engineering and engineers designing and developing mechanisms in their own fields this book provides a useful overview of classical theories and modern approaches to the practical and creative application of mechanisms in seeking solutions to increasingly complex problems

resilience is one of the hottest terms in the modern humanities social sciences and beyond the reason for this is the current situation at various levels from ecological health economical to political which requires the formation of resilience from individuals communities countries institutions and humanity as a whole the term resilience refers to a new realistic paradigm in tackling the challenges required by the modern world in which changes are happening faster and faster and are becoming less transparent and predictable therefore the paradigm of stability and protection against disturbances is no longer realistic and has been replaced by the paradigm of resilience people natural and social systems can no longer be protected from ruptures but must become as resilient as possible this in turn raises a number of issues involving ethical questions and challenges for religions this book addresses these issues in a holistic and interdisciplinary way that fits the multifaceted nature of resilience

excerpt from modern mechanism exhibiting the latest progress in machines motors and the transmission of power but modern progress in all the great fields of invention and discovery is moving with a constantly accelerating speed in the bending of that great force of nature which we call electricity to human needs advances are becoming almost a matter of hours a decade of such onward motion calls for a new record a new crystallization of the results and a new effort to bring them in the same tried and assimilable form to those who constitute the hands of the nation hence the present volume it is not a revision it is a new book dealing solely with the principal and most

useful advances of the past ten years and it is therefore issued under a new name which exactly describes its contents modern mechanism it does not supersede the cyclopaedia of mechanics but adds to it about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
