in the framework of criminal justice originally published in 1981 the criminal justice process is analysed by using six models each of which expresses a different justification for criminal justice and punishment the due process model exacting justice between equal parties the crime control model punishing wrong and preventing further crime the bureaucratic model controlling crime and criminals the medical model rehabilitating offenders the status passage model publicly denouncing the crime and criminal and the power model maintaining domination by the ruling class and reinforcing class values the study examines the formal rules and procedures of the

magistrate court system within the context of these models and also discusses the roles of the actors police defendant magistrate court clerks and lawyers next the study depicts eight scenes that occur from the defendant s arrest through a court hearing to sentencing it assesses how closely the activity and behaviour within the system follow the formal protections granted by the british system of justice and it concludes that the process is far more complex and the rules far more open to interpretation than is commonly believed the book suggests that this miscalculation has led to the failure of various reforms special attention is given to the bail reform act of 1976 and two sections of the criminal law act of 1977 it further suggests that real reform must depend upon an understanding of the political nature of the criminal justice system
