the use of mixed methods designs for conducting research has become a major trend in social science research renowned methodological experts janice morse and linda niehaus present a guide to intermediate and experienced researchers on the possibilities inherent in mixed method research they offer the basic principles of conducting this kind of study then examine a wide variety of design options available to the researcher including their strengths and weaknesses and when to use them providing examples from a variety of disciplines examining potential threats to validity and showing the relationship between method and theory the book will be a valuable addition to the methodologist s library and a useful text in courses in research design

the new 4th edition of seider s product and process design principles synthesis analysis and design covers content for process design courses in the chemical engineering curriculum showing how process design and product design are inter linked and why studying the two is important for modern applications a principal objective of this new edition is to describe modern strategies for the design of chemical products and processes with an emphasis on a systematic approach this fourth edition presents two parallel tracks 1 product design and 2 process design with an emphasis on process design process design instructors can show easily how product designs lead to new chemical processes alternatively product design can be taught in a separate course subsequent to the process design course

this book introduces readers to the core principles and methodologies of product development and highlights the interactions between engineering design and industrial design it shows to what extent the two cultures can be reconciled and conversely what makes each of them unique although the semantic aspect is fundamental in industrial design while the functional aspect is essential for the industrial product the interaction between the two worlds is strategically vital design is also a strategic problem solving process that drives innovation builds business success and leads to better quality of life through innovative products systems services and experiences the book connects product development with the concepts and strategies of innovation recognizing that product design is a complex process in which invention consumers role industrial technologies economics and the social sciences converge after presenting several examples of artifacts developed up to the conceptual phase or built as prototypes the book provides a

case study on a packaging machine showcasing the principles that should underlie all design activities and the methods that must be employed to successfully establish a design process the book is primarily targeted at professionals in the industry design engineers and industrial designers as well as researchers and students in design schools though it will also benefit any reader interested in product design

in a mixed method tradition that privileges the quantitative leading qualitative researcher janice morse breaks new ground by arguing the importance of research designs for which the primary component is qualitative and contains either a quantitative or a qualitative supplemental strategy using a variety of examples and visual prompts morse convincingly demonstrates that such designs allow novice researchers to obtain answers more quickly and with more certainty her book provides clear and concise explanations making even complex research designs understandable to the beginning researcher argues for the importance of primary qualitative designs due to their theoretical strength stresses the importance of using goal directed actions and analyses that do not violate the assumptions of either qualitative or quantitative inquiry

process intensification is a comprehensive textbook and treats the theory of process intensification design and all innovation steps from idea generation to commercial implementation and all focused on contributing to the un sustainable development goals this book covers the hard elements of design modelling and experimental validations and the soft elements values of engineers interests of stakeholders and beliefs of society

this textbook aims to guide instruct and inspire the next generation of innovation designers managers and leaders building upon an evidence based innovation development process it introduces explains and provides visual models and case examples of what business design is how it is applied across sectors and organizations and its impact on decision making and value creation students will read and analyze design led innovation business cases from across the globe discover multi disciplinary strategies from marketing to anthropology and practice applying a designer s toolkit to find frame and solve business problems in contemporary ways throughout the book students will break down the process of innovation and move from initiation to implementation engage in iterative feedback loops and develop concrete plans for personal and professional collaboration and workplace application for mba and senior undergraduate students this book offers a step by step and comprehensive reference guide to creative problem framing and solving inside and beyond the classroom it integrates marketing principles and management frameworks with anthropological and design methods reflecting the diverse and in demand skills vital to tomorrow s workforce

for instructors this book offers a way to confidently engage learners in the realm of design practices and strategies relevant to business decision making the pedagogical framework along with a comprehensive suite of techniques and templates offers both novice and experienced teachers a step by step reference guide that facilitates skills development in creative problem framing and solving

designed to get readers quickly up and running with the full complement of ui strategies tools and techniques this extremely practical guide offers step by step guidance to all important methods now in use in chapters authored by the methods inventors themselves
